Description	Unit
PZ50 Three-bin	1set

OPTIONAL - Coal-milling

Price: \$34,000.00

Main Description

Description	Unit
Burning coal	1unit

OPTIONAL – Finished Elevator System

Price: \$20,000.00

Main Description

Description	Unit
9 Tons	1set

OPTIONAL – Washer Dust Filter

Price: \$12,000.00
Main Description

Description	Unit
Washer Dust Filter	1set

OPTIONAL – Asphalt Tank

Price for 30m³: \$19,000.00

Price for 40m³: \$25,500.00

Main Description

Description	Unit
30m ³	1set
40m ³	1set

Some Asphalt Plant Options and Their Functions	
General Information	The main machine functions as a complete unit, without any real need for additional components. The options are designed to improve the production quality and efficiency of the main plant in different ways, as described below.
Option	Function
Aggregate Dosage	This device filters the asphalt chip/ concrete mix in different grades This device, therefore, improves the quality of the asphalt chip/ concrete mix. The different grades of mixture will be selected according to the soil or ground grade – for example surface, middle, bottom.
Coal-Milling Machine	This device makes the milled aggregate smaller. It mainly used in the Russian environment.
Asphalt Tank	This device keeps the mixture warm and is used to warm it, when cold. It stores the finished product - in addition to the

Some Asphalt Plant Options and Their Functions	
	drum, which has a limited capacity (approximately 100 kg mixture). The main machine is, therefore, freed up to continue produce the mixture, with finished product being stored separately in the asphalt tank.
Washery (Water Filter) or Air Bag Filter	This device is mainly for environmental purpose. It is used to diffuse dust from the air, reducing the amount of pollutant released in the air.
Finished Elevator System	The Finished Elevator System helps to maintain the temperature of the mixture, before it is delivered to the truck or other transporter.
