HRODC-PB Family of Book Binding Machines

Perfect Binding Book Binding System

HRODC-PB Family of Book Binding Machines is a product of Advanced Technological Research and Development. Its leading-edge technology, combined with its price competitiveness positions it to the competition in both the Professional and Entry-level Sub-Sectors of the Book Binding Industry, Internationally. Book Binders are highly placed to benefit from Advanced Technology and Patented Components, the product of several years of technological development, including:

- Non-glue Head and Non-glue Tail Patent
- Vertical Clamp Cover Patent
- Clamp Cover Height Adjuster Patent
- Flat-Book Patent
- Hard Chrome Technology for Flat-Book Clamp
- Speed Change Technology
- Open-Book Clamp Design
- Smoke Exhaust Design
- Triple Glue-Roller Design
- Intelligentized Design , with a Digital Display Screen

Suitability of HRODC-PB Family of Book Binding Machines

HRODC-PB Family of Book Binding Machines is particularly suited to:

- Professional Book Binders and Book Binding Establishments
- Drop-on-Demand Book Binders
- University Book Binding Facility
- College Book Bindery
- Photocopy Shops
- High street book binding facility
- Dissertation Binding
- Thesis Binding
- Book Publishers
- Corporate Publications
- In-house Publications
- Working Paper Publications
- Catalogue Binding
- Brochure Binding

 Soft Cover Book Binding

Patent of HRODC-PB Family of Book Binding Machines		
Design and Patent Name	Design and Patent Description	Design and Patent Image (where available)
Non-glue Head and Non-glue Tail Patent	Non-glue head and non-glue tail patent technology allows book binders to set the binding size on the micro-computer control system, the binding machine automatically removing the unwanted glue head and glue tail, making overspill a thing of the past.	
Vertical Clamp Cover Patent	Vertical clamp cover patent is one of technology breakthroughs of HRODC Family of Binding Machines, placing these binding machines in a superior class to their competitors. This technology effectively solves the problems of the cover not curving enough. In our technology, the book clamp ensures that the book cover will be perfectly placed for binding, even where books of different thickness are being bound.	
Clamp Cover Height Adjuster Patent	This technology completely solves the problems of too square or round when binding different thick covers, now you just only to adjust the left and right hand-wheel to meet the requirements of binding different thick covers.	
Flat-Book Patent	This flat-book technology facilitates the adding or removal of book covers at any point during the operation, greatly enhancing the binding speed.	
Hard Chrome Technology for Flat-Book Clamp	The hard chrome clamps book flat, facilitating a flat and smooth finish, enhancing the aesthetic value of your book binding production. These features also give rise to the strength and durability that a professionally bound book demands.	
Speed Change Technology	HRODC-PB Family of Book Binding Machines boasts a speed change technology, which results in a 30% productivity increase, leading to huge efficiency gains. This technology facilitates binding speed change, at the book binder's convenience and book requirement	
Open-Book Clamp Design	This technology clamps the book in such a way that the book cover can be added or removed at any point during the book binding process, maintaining binding speed and presenting much convenience to the book binder.

Triple Glue-Roller Design	The Triple Glue-Roller Design of HRODC-PB Family of Book Binding Machines facilitates a synchronised glue application and glue scraping, resulting in a flat and even finish. The result of this technological facility is an aesthetically appealing presentation of a professionally bound book	
Intelligentized Design , with a Digital Display Screen	HRODC-PB Family of Book Binding Machines utilises a 32 bit chip, which enhances its functionality, facilitating 'super-setting functionality'. Its Digital Display Screen contributes to a simplified book binding operation and functionality. Added to the its operational 'perfection' is its Auto-detect system, which constantly checks the operation of the machine – warning the book binder of any imminent or actual problems, with advice where practicable.
